

Dear Customers,

Enclosed some information about our product: **Diff Gear Shaft Evo 2012**

- The set includes: diff bevel gear axle, spring, c-clips, shims (1,0mm / 0,5mm / 0,2mm)
- Set up the distance of the bevel gears to 30mm (+/- 0,2mm), therefore use the shims between c-clips and bevel gears
- You can preload the spring by using all other shims between spring and bevel gear, either with or without a diff spacer
- This set is especially made for racetracks with tight corners (lowspeed track)
- Note: car can be instable in highspeed corners using this set

Have fun and enjoy – SCS M² Engineering Team
